

## Summer test: Which world do you live in?

*It's all falling into pieces, apparently....Anyway, that's what people say. All sorts of people, for all sorts of reasons and with all sorts of feelings. Now that this idea of irreversible change begins to settle down into the mass consciousness, the only thing left to do is to experience it...*

*Where are you in this process? To what an extent do you still cling to official definitions of reality, drawing out your sense of being alive from the last whims of a dying system? In other terms, what amount of suffering are you still willing to experience? To help you figure it out, I have designed a test to let you to evaluate on which side of "reality" you are. Answer the questions, then see the interpretations on next page. Enjoy! Alain-Yan*

**RESULTS**

Start by counting the number of answers with A, B, C, D, E or F.

**If you have a majority of A:**

You can start to liquidate your business right away, your presence on the planet cannot be sustained much longer - any prolongation of your sojourn could prove to seriously damage your energetic structure. However, there's no reason to worry: a place is already booked for you on a strong density planet of the north zone of the galaxy, where the conditions will better fit your expectations and promote your flowering.

**If you have a majority of B:**

Experimenting dependance and powerlessness has certainly enriched your knowledge. However, this type of approach is altering the energetic structure of the being, leading to ego-centredness and disconnection from the universal abundance. The grids inducing this sort of attitude have been deactivated since some time now. In order to avoid useless suffering, or even an immediate relocalisation, it is in your best interest to get rid of any victim habit, even if you can loose apparent advantages. And finally, the good news: the others do exist!

**If you have a majority of C:**

Unless you operate a radical shift, you can also liquidate your business and get ready to join your classmates of the group A. Effectively, you are inseparable game partners, and the play is far from over. Whatever happens, all is for the best: in your actual mode of conscience, life on planet Earth will rapidly become an ordeal, as duality is for you a fundamental existential condition.

**If you have a majority of D:**

Basically, you wish to live in harmony, to see the end of separation, and you feel the inner impulses that the changes trigger. Yet what a laziness! So many compromises every day! Becoming aware is the first step of awakening, action is the next. You have already ignited the process of transformation; don't wait the last minute to experiment its steps: it will be less violent!

**If you have a majority of E:**

Aware of the present transformations, you have made important choices and realigned your life to fit to the new energies and challenges that lies ahead. However, in your enthusiasm, you fail to notice a number of fundamental beliefs inherited from history that are distorting your perception of yourself and the world. Swap linear thinking for an holographic approach, stop hesitating, exercise multidimensionality and don't take this whole story so seriously!

**If you have a majority of F:**

Thanks to be here! Any extra blah-blah is useless, you know what you're doing, where and what you are. It's also pointless to tell you about progress, steps, evolution, time, joy or suffering...

Only one comment: be careful in your speeches and attitudes: for some more time, your simple presence can prove to be totally exasperating, even devastating. Yet please, keep on!
